

# EMPOWER YOUR TEAM TO ACCELERATE AND ENHANCE INVESTIGATIONS

**Efficiently orient investigation efforts towards the paths of most interest and enforcement actions towards maximum efficiency.**

The media and entertainment industry faces a dilemma due to a plague of illicit services that often look genuine to consumers. Pirates have become sophisticated with using obfuscation technologies in building complex networks to make identification and prosecution extremely challenging. Fight back with the tools to conduct deep-dive analysis of pirate ecosystems. Enable investigators to leave data gathering and correlation work to the service so that they can scale up and improve the quality and speed of investigations.

## SERVICE BENEFITS

### **Build Extensive Intelligence on Criminal Organizations:**

Automatically gather, correlate, and process data from a multitude of internal and external data sources, including NAGRA's unique data feeds. Detect repetitive patterns and build graphical representations of pirate ecosystems, visually exposing critical actors and infrastructure, highlighting links between entities that may have been overlooked in traditional investigations.

**Drastically Reduce Investigator Workload:** Enable investigators to rapidly extract relevant information from large datasets, selecting what is useful and discarding the superfluous.

**Take Informed Intelligence-Based Decisions:** Prioritize resources by identifying the best targets and the most impactful actions per target to disrupt and neutralize pirates effectively.

## Anti-Piracy Services - Ecosystem Explorer

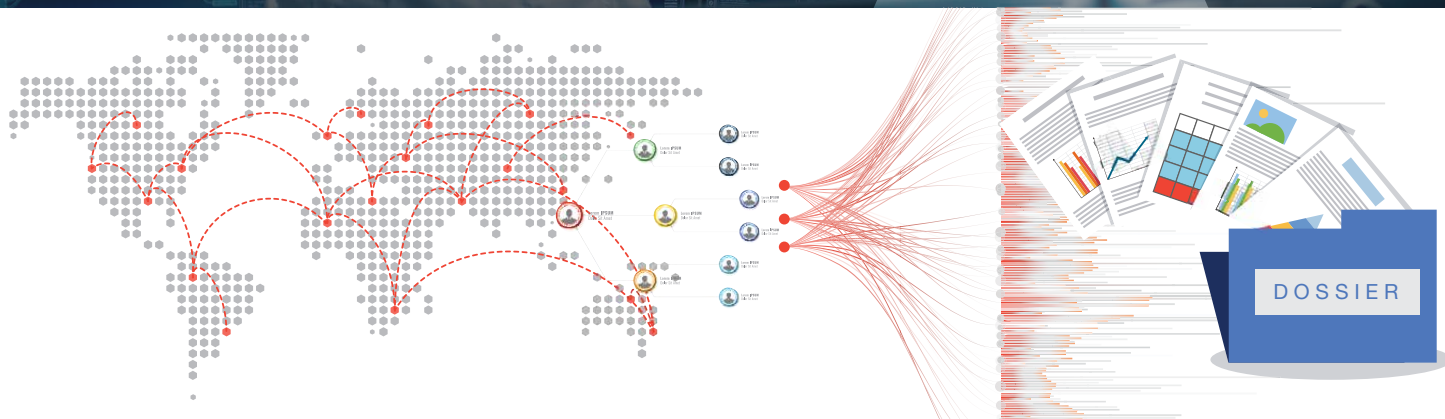

### **▲ CENTRALIZED INFORMATION**

- Brings into a single platform a world of information from internal databases and external data sources: monitoring labs, purchasing tools, past investigation reports, social media, third-party data providers, Internet crawling
- Easy integration of additional sources

### **▲ ACCELRATE INVESTIGATIONS**

- Swiftly collects and enriches data on criminals' online resources
- Automatically gathers and summarizes extended data sets
- Uncovers links between actors, exposing whole ecosystems
- Increases team member efficiency – saving work hours per person and per case

# TAKE INFORMED, INTELLIGENCE-BASED DECISIONS

1 Automatically aggregates and correlates data from numerous sources

2 Visually exposes critical actors and infrastructure, highlighting links between entities

3 Empower investigators to take informed, intelligence-based decisions

GLOBAL PAY-TV LEADER, \$1B REVENUES, LONG-TERM STABILITY

## WHO WE ARE

### SUCCESSFUL PROJECTS

**500+**  
TV Providers  
Globally

Focused on helping solution providers increase monetization and consumer reach through comprehensive security solutions.

### SATISFIED CLIENTS

**500m**  
Secured Devices  
Served Daily

Customer-focused. Delivering solutions as a service to optimize time to market and reduce operational overheads.

### CUSTOMER PROTECTION

**4000+**  
Patent Portfolio

Robust IP protection with over 500 patents attributable to a wide range of innovative technology solutions.

## FULLY CHARGED AND READY

Consumers are the central focus of all NAGRA Kudelski solutions. Working worldwide with major pay-TV and streaming service providers, we continually incorporate learnings and investment to ensure our solutions are fit-for-purpose to face the demands of today's consumers.

From turnkey applications to custom application development, NAGRA Kudelski is here to support your business needs.
