

NAGRA SCOUT - CONNECTED LIFESTYLE SECURITY

Security Simplified - at Home and on the go

NAGRA Scout – an all-in-one solution offering unmatched device visibility, comprehensive protection, effortless control, and network troubleshooting for a worry-free and secure digital haven.

Provide subscribers with simplified security, addressing the challenges of the smart device era. Our innovative solution empowers users to take control of their home network security through a single, user-friendly smart home app. Manage and monitor network activity effortlessly, ensuring a secure connected lifestyle at home and on the go.

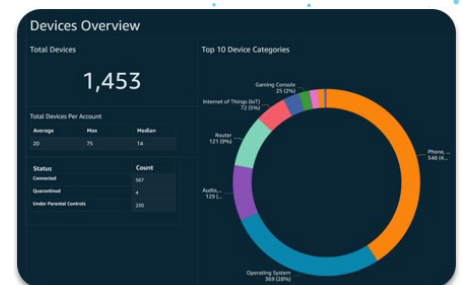

For ISP's, NAGRA Scout not only benefits your subscribers but also equips you with tools to optimize network assets. Gain insights into user behavior, allowing you to deliver services that enhance satisfaction and foster loyalty. Elevate your network management seamlessly with NAGRA Scout.

Solution Benefits

- 1 Improve First-Call Closure Rates:** Identify and resolve subscriber issues rapidly thanks to advanced contact center diagnostic tools that access real-time device and home network usage. You reduce resources spent on troubleshooting and focus on real-time support that improves customer satisfaction.
- 2 Build New Business Cases:** Understand and anticipate your customer needs through comprehensive data analytics. Combine with business insight to offer relevant additional consumer services e.g. fitness, food, health, energy, child services, and physical security.
- 3 Get Data-Based Insights for Infrastructure Investments:** Leverage the data dashboards to gain visibility on how subscribers are using the network and use this information to support intelligent network development.
- 4 Deliver Cutting-Edge Security:** Offer protection from malware and other cyberattacks via automated alerts, updates, and remediation advice. NAGRA Scout learns from changing subscriber behavior and threat patterns to anticipate attacks before they happen.

Turn Visibility Into Business Value

IDENTIFICATION

Detecting and identifying the devices connected to the network

PROTECTION

Detecting and blocking malicious traffic and detect anomalies in your network

FILTERING

Parental control & password management

TROUBLESHOOTING
