

NEXGUARD FORENSIC WATERMARKING

Secure Your Review and Collaboration Workflows

Protect any video during playback, download or publishing

Leaks can occur during creative work, reviews, or approvals, and any prerelease leak can substantially negatively impact the box office revenue and marketing activities.

Studios and original content owners can now apply forensic watermarking in review and collaboration workflow during movie production and postproduction to help prevent negative consequences of leaks. Traceability and identification are the foundations of deterring pre-release leaks.

Solution Benefits

- 1 **Seamless Security:** Protect any video during playback, download, or publishing.
- 2 **Robust Protection:** Trace the source of leaks from screen captures, camcorders, encoding, and compression.
- 3 **Natively Integrated:** NexGuard Forensic Watermarking is natively integrated into the Adobe/Frame.io, X2X/PIX and Sony CI platforms. The unique watermark is automatically generated per playback, download, or content publishing.

For over 20 years, major movie studios, original content owners, and third-party partners worldwide have entrusted NexGuard Watermarking technology

NexGuard Watermarking for Review and Collaboration Platforms

NAGRA has partnered with the leading platforms to provide content security for your review and collaboration workflows.

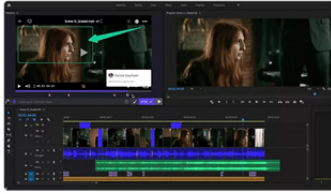

The integrated solution protects secure cloud-based apps, real-time review and approval, accelerated file sharing, and instant dailies.

 **frame.io**

PIX[™]

Protect any Takes, Shots, and Dailies From Leaks During Movie Production

frame.io

Key Features:

- NexGuard Forensic Watermarking natively integrated into Adobe/Frame.io and X2X/PIX platforms
- Protect any video during playback, download, or publishing with NexGuard Watermarking, natively integrated into video review and collaboration platforms.
- Quick detection time
- Blind detection, with no reference file needed to perform the forensic investigation
- Identify the user responsible for leaking any pre-release content
