

ANTI-PIRACY SERVICES - IP BLOCKING

Increase the Effectiveness of Copyright Infringement Blocking

Are You Prepared To Protect Valuable Content, Rights, And Revenue?

Take action with a single industry-wide copyright infringement platform designed to collect, validate and dispatch pirate service blocking requests to Internet Service Providers (ISPs). Empower critical stakeholders to submit evidence in copyright infringement cases, track progress and drive blocking outcomes. Provide full interactivity and visibility with support for static, dynamic, and live blocking and de-listing approaches and management of all types of blocking requests.

Solution Benefits

- 1 Rapid Evidence Submission:** Through a simple GUI and API-supported workflow engine.
- 2 Complete Visibility:** Provides both a global and country-level perspective of blocking requests.
- 3 Full Traceability:** Ensures stakeholders can trace requests from submission to execution.
- 4 Local Requirement Fulfillment:** Driven by configurable regulatory authority integration.
- 5 Centralized ISP Compliance:** Delivers situational status to stakeholders once regulators issue simultaneous blocking requests.
- 6 Regulator-Validated Requests:** Dispatched for ISPs through a configurable API for timely execution.

IP Blocking - NAGRA Hermes Platform

Secure Platform

Workflow driven for content owners, anti-piracy vendors, regulators, and ISPs.

Effective Case Management

Create and monitor infringement cases and submit evidence in various formats for regulatory approval.

Progress Visibility

Get instant updates on the status of your active blocking requests dispatched to Internet Service Providers.

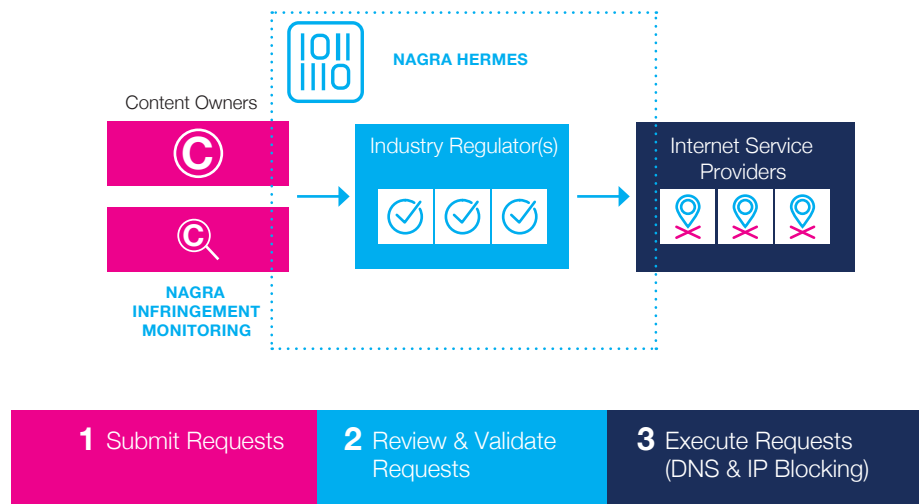

Comprehensive Data & Transparency

Receive and utilize detailed insight via activity reports, alerts, and analytics through a secure Cloud-based platform with monitored access.anti-

A Single Copyright Infringement Platform

Key Features:

- Ready-made framework for submitting infringement requests
- Configurable validation workflow to include single or multiple regulators
- Automated dispatching of blocking requests to Internet Service Providers
- Dashboards and alerts to stakeholder users for tracking requests and actions
