

The Diabolical Dozen of North America

Despite efforts to crack down against illegal TV streaming services, pirate IPTV is a growing market, driven by strong consumer demand.

New players are entering the market and thanks to advances in technology, launching illegitimate streaming services is as easy as opening a laptop.

As the market changes, piracy business models evolve. Smaller groups are joining up, sharing resources, spreading the risk and widening their profit margins.

This graphic highlights the impact of the top 12 piracy reseller groups in just the US and North America.
